Jonathan Guerrero Perez

Employment History

Sure-Fi, Provo Utah — *Software Engineer*

January 2017 - Present

- Developed an Android App which connects to a product through Bluetooth Low Energy in order to change configuration options.The app is on the Play Store and is used successfully for clients of the company.

- I sped up the product shipment process by creating an iOS app to validate addresses and generate (and print) UPS labels using the UPS API. It also integrates directly with an app used by the sales team.

- Personally developed a company website saving the cost and complexity it would take to outsource the website development and allowing us to change to website quickly and easily. This allowed for quick updates when the business model changed, which would not have been possible if the website had been outsourced.

Soriano Ariza, México City — *Web Systems Developer*

July 2014 - January 2017

- I fully designed and created a Web System to request, process and deliver the office supplies to all the buildings along the country as well as the reports and expenses.

Education : UNAM, Mexico City — *Bachelor Degree Computer Scientist*

July 2011 - June 2015
